Attention : Dr Angela Yu

Dear Teacher,

My name is Oualid Ismaili, I am 25 years old and currently studying web development at the Openclassroom school in France.
Openclassroom is a mooc offering degree courses,

Since I am in middle school I have had to stop traditional school and start studying at home because of certain medical conditions. In France, children, under certain conditions, have this opportunity to do to school at home.

To do this, there are some schools specialising in distance learning, from kindergarten to post-baccalaureate degree.

Once enrolled in a school, the school sends documents containing the lessons as well as a series of tests that the student must complete and then send by post to his or her dedicated teacher, who can also be reached in case of difficulty. Then, at the end of the year, the student is called to a school to check whether he or she has all the knowledge required for his or her class.

The fact that I have always studied without being directly surrounded by a teacher has therefore made me much more autonomous, I always manage to solve the difficulties I may face. It also allowed me to improve my concentration and stay focused on the tasks assigned to me.
After high school, I wanted to continue teaching in the same way, which is why I joined the mooc Openclassroom and continue to train at a distance.

However, distance learning also has a major disadvantage, which I did not see coming: the lack of self-confidence. Despite the fact of validating school projects, when I looked at the job offers I couldn't help but think to myself: but do I really have the ability to achieve the things mentioned in these job offers, especially when I don't understand certain terms?

This experience made me realize that I didn't really know where to go once I graduated. That's why I started looking for other courses on the Internet, in order to acquire more skills and that's when I came across your courses (The Complete 2019 Web Development Bootcamp).

As I watched your lessons, I could see how pleasant it could be to teach, I also remembered a word that someone said: *the best way to learn is to teach*. That's why I also joined your discord and started helping students with their codes. I spent whole evenings helping students and what a joy to see a student understand, succeed and above all gain self-confidence but also to be thanked in return:

Linnaia 16/04/2019

thanks so much for all the help!! You're a good teacher. I'm sure you would just as well like to work on your own stuff. I have to go, but if you reply I'll see it tomorrow after my work day

This experience has allowed me to open my eyes to what I really want to do, and especially how. What I want to do is give or restore confidence to anyone who may doubt their ability. Whatever the school, the bootcamp, the training they have chosen, all these people will be able to benefit from a service that will restore their self-confidence and help them to progress,

That's why, Dears Teacher, allow me as a student to assist you in your work, allow me to be a member of the AppBrewery (more in the App than in the Brewery) and later, please help me build this company that will restore confidence to students.

I'm actually looking for an « apprenticeship » because i realized that i really don't like PHP, and want to learn another language, OpenClassrooms(the mooc) offer several degrees in web development, and also in ios and android app developer, but i would like to talk with you before taking any desicions.

I have a good knowledge of HTML/CSS, as well as Wordpress CMS.
I also know the basics of php language as well as POO, Javascript and Bootstrap.

I only want to progress and learn new things while being useful. I am not a random student who, once his task is completed, will go home and start his routine again the next day.
I'm the little brother you can count on to go pick up a pizza, go shopping, pick up the kids at school and finish all the tasks you give him anytime (or maybe not in the middle of a game)

However, I would very much like to have the chance to meet you or at least have a videoconference session. English is not my native language, but i'm ready to improve myself by taking english courses .

Here is my CV

<https://bijoualid.github.io/CvAppBrewery/>

https://bijoualid.github.io/OC_P2/

So for all of that and more i see in the next lesson.

ISMAILI OUALID
